LinkedIn: <https://www.linkedin.com/in/doctor-nhambe-41a5083ba/>

Professional Summary:

Self-driven Agricultural Data Analyst combining a final-year degree in Agricultural Extension with self-taught expertise in Excel and SQL. Specialises in transforming agricultural data into actionable insights through dashboards, risk models and data pipelines. Actively building a domain-specific portfolio targeting NGOs, agritech companies and development organisations across Southern Africa. Available for internships and part-time work now, transitioning to full-time from December 2026.

Education:

Bachelor of Agriculture in Extension and Rural Resources Management

University of Mpumalanga, Mbombela

2024 -2026

Final year - completing coursework November 2026, graduation May 2027

Strong foundation in agricultural systems, rural development and resource management

Technical Skills:

- Excel - Advanced formulas, pivot tables, VLOOKUPs, financial modelling, interactive dashboards
- SQL / PostgreSQL - Database design, complex queries, joins, aggregations, foreign keys
- Python - Data analysis
- Data Visualisation - Interactive charts, KPI cards, slicer-driven dashboards
- Critical Thinking & Problem Solving

- Leadership & Team Coordination
- Communication & Public Speaking

Projects:

➤ Crop Intake Quality Analyser | Excel | 2026

- Built a weighted risk engine evaluating 7 quality metrics including moisture, aflatoxin levels and insect damage per batch
- Automated Accept/Reject decision logic with high-risk alerts for critical quality thresholds and reducing manual assessment time by 75%.
- Flagged an estimate of 7 batches being of high risk, potentially preventing 47% spoilage rate across 15 farmer entries.

➤ Farm Profitability & Cost Tracker | Excel | 2026

- Designed interactive dashboard with slicer-driven KPI cards and dynamic pie charts showing top 3 crop profit margins per farm
- Tracked budgeted vs actual input costs across 9 farms in 9 South African provinces, Ranked top 3 crops per farm by gross profit margin.
- Enabled data-driven planting decisions that potentially improve ROI by an estimated 60%.

➤ Regional Agri Sales & Revenue Analyser | Excel & SQL| 2026

- Analysing fresh produce sales and revenue across South African regional markets using real agricultural data
- Analysed R413 million in agricultural revenue across all 9 South African provinces, identifying Mpumalanga as the top performing province and lamb as the highest revenue product across 20 suppliers.
- Dashboard tracking revenue by province, category, product and supplier

➤ Crop Yield Predictor:

- Compared 2 Regression and Random Forest model across 28243 data points, with Random Forest achieving R^2 of 0.99 and RMSE of 10,181.76,

an 87% reduction in prediction error compared to Linear Regression baseline (RMSE: 81,501.76, R^2 OF 0.08). Identified key yield influencing variables through feature importance.

Certifications:

- Spreadsheet Mastery - Saylor Academy
- Data Fundamentals -IBM SkillsBuild
- Statistics for Data Science - IBM SkillsBuild
- Relational Database & SQL (PostgreSQL) – freeCodeCamp
- Python for Data Analysis - freeCodeCamp

Leadership & Achievements:

- Class Representative - University of Mpumalanga | 2024 - 2025
- Represented student interests in academic and administrative discussions
- Facilitated communication between students and faculty

Awards:

- Certificate of Appreciation -Leadership Skills (2024)
- Certificate of Appreciation -Debate Competition (2024, 2025)
- Certificate of Appreciation -Short Story Writing (2025)
- Certificate of Appreciation - Most Punctual Learner (2023)
